

I pay for satellite radio because it provides what I want to hear in my home car and office. I have a choice of what I want to hear with out being forced to listen to mindless commercials. I am willing to pay for the support of this privlidge and I do feel that others should NOT be permitted to reduce my choices of what may be offered by the producers of this service. It provides me with information and entertainment of my choice when I want or need it. The services of traffic, weather, airport conditions along with a choice of type of music and news is the type of service needed to replace the GARBAGE being broadcast on AM and FM radio.
